

## Project Yotsuba

# Benchmark Report

## Only for XML Query Feature

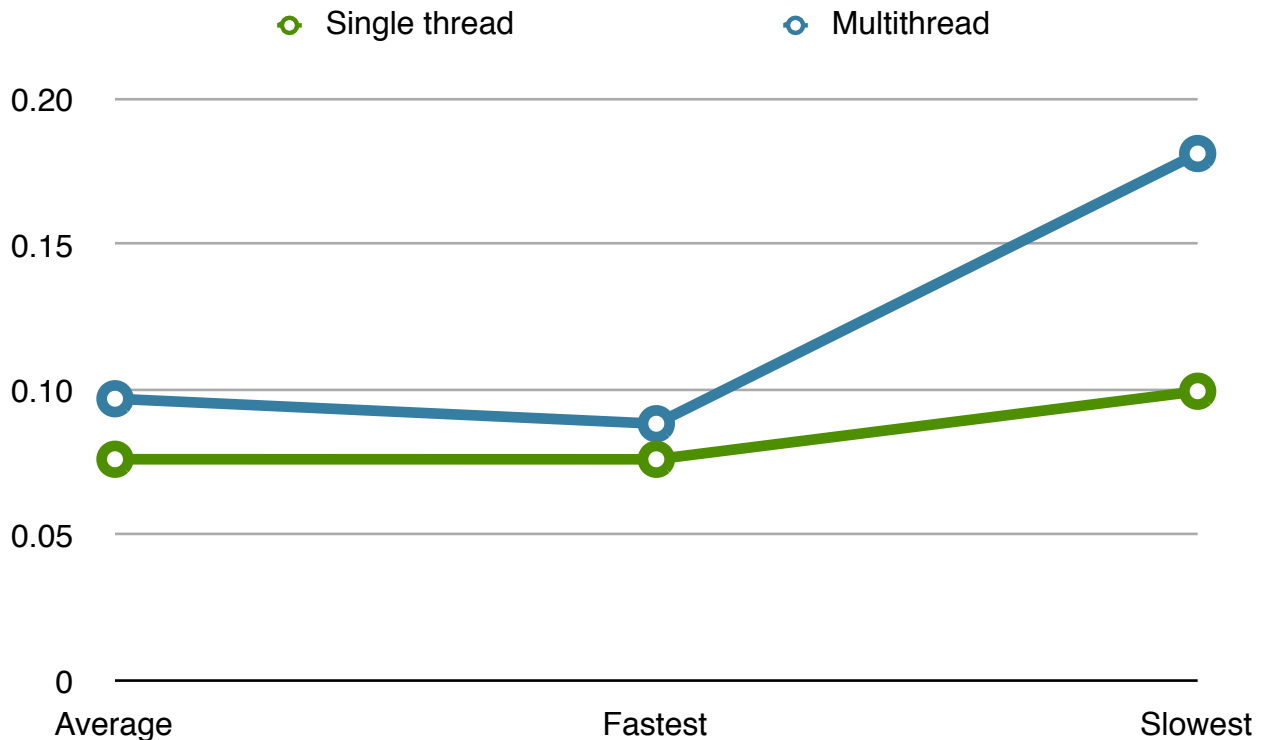

### Tester

Juti Noppornpitak (juti\_n@yahoo.co.jp)

### Testing Environment

Apple Macbook (1st Generation) 2.0 GHz with 2 GB of 667-MHz DDR2 RAM

### Result

As we can see here. With two hundred stimulate tests, in the same environment, single-thread XML query is faster. However, please remind that the testing environment was not in the favour of multithreading.
